

## **The tale of Global Hardware Limited and the customer is king mantra.**

Three years into operation, Global Hardware Limited has built a name and reputation as the unrivaled market king in the manufacture and stocking of some of the most sought after and superior quality hardware brands in the region. These brands imported from traditionally respected manufacturing zones like China and India, coupled with our unflinching commitment to customers' needs in a fast changing market has given us a competitive edge.

And as technology gains pace at unprecedented levels both globally and locally, we have positioned ourselves to bring the new technology at the doorsteps of our clients.

For example the household Video Home System (VHS System) of yore is fast being replaced by the superior DVD collections. The burgeoning demand for the DVD storage solutions has seen us get the customers what they need and deserve. We have introduced the widest selection of CD, DVD, Cassette, and Videotape storage solutions of 6 ft,3.5 feet width,40 kg weight related accessories at fair prices in different colours. We have a collection of over 27 DVD racks, each selected for its commitment to style and function. Our selection includes laminated MDF furniture with beautiful veneers in beech, white and walnut; whatever your style preference, and however many DVDs you own, we've got a DVD storage solution that is right for you.

And as we meet more than 95% of the requirements of the hardware items, this makes us the True 'ONE STOP SHOP'.

Our core values of commitment to offer the best service make us the essential go-to point for any hardware. We have gone beyond just CD's and DVD's to also cater to other sectors of the economy with our wide array of enviable products.

Whether in agriculture, iron mongery, prefabricated houses or offices, we have an answer to every customer's need.
